### Job description
The Department of Computer Engineering is seeking to recruit one lecturer. The appointment will involve teaching in undergraduate level courses, supervise bachelor thesis, and participate actively in the research and administrative activities of the department and of the University.

As a lecturer, the candidate is expected to teach courses broadly related to computer graphics and animation, multimedia signal distribution, digital photography, and related fields.

Special requirement/s: The appointed professional will be responsible to establish regional collaboration with the industry within the field of subject. A key goal is to further develop collaboration with regional companies to carry out Epoka University R&D projects. Furthermore, a key requirement is to develop the collaboration between the University, the industry, and the society in general. The position may also involve development of various terms of reference for educations contract as well as various types of academic and administrative tasks within the University.

### Requirements
Master of Science in Electronics and/or Telecommunication Engineering

### Assessment criteria
1. Demonstrated pedagogical skills through teaching at under-graduate level included planning and implementation, evaluation, supervision, and examination.
2. Ability to collaborate, create and maintain networks with the community; academia, trade, industry and public organizations.
3. Good communication skills and ability to demonstrate good level of English in both speaking and writing is required.

Epoka University is an equal opportunity employer and encourages applications from both genders, persons with different abilities, minorities etc. This will contribute to the further diversification of the University staff.
